WEBINAR ON ADVANCED & SUSTAINABLE MANUFACTURING IN DENMARK

MAY 25, 2021 / 09.30-11.00 (UK TIME)
ONLINE

[REGISTER HERE](#)

INVEST IN DENMARK PRESENTS A UNIQUE OPPORTUNITY TO GAIN INSIGHTS ON POSSIBILITIES WITHIN ADVANCED AND SUSTAINABLE MANUFACTURING IN DENMARK

Invest in Denmark - the national investment promotion agency - together with Danish Technological Institute, Odense Robotics and MADE – Manufacturing Academy of Denmark invite you to join our webinar on advanced and sustainable manufacturing. Gain a special insight in the Danish manufacturing eco system and your possibilities to establish a modern, digital production in Denmark, enabled by collaboration, innovation and the need for a sustainable transition.

KEY ORGANISATIONS FROM THE DANISH MANUFACTURING ECO SYSTEM WILL BE SPEAKING

DTI - DANISH TECHNOLOGICAL INSTITUTE

[DTI](#) is a leading research and technology company helping customers converting the newest knowledge and technology into value and believe that the green transformation, global challenges and sustainable solutions go hand-in-hand with responsible growth, employment, global competitiveness and good business. DTI are experts in research, production, environmental technology, business energy and many more with its +70 laboratories and +1000 specialists.

ODENSE ROBOTICS

[Odense Robotics](#) - Denmark's national robot, automation and drone cluster – brings together the entire ecosystem to drive innovation and growth in the industry nationwide. The aim is to strengthen its members' market position through innovation, global growth, networks and visibility as well as start-ups. The cluster is founded on partnerships with leading Danish knowledge institutions.

MADE – MANUFACTURING ACADEMY OF DENMARK

[MADE](#) is the national Cluster for Advanced Manufacturing with over 220 members. MADE aims at being a one stop shop for Advanced Manufacturing working with Applied Research, Innovation and Education and by having a strong network throughout the country. The vision is to enable world class manufacturing in Denmark through the development and implementation of innovative manufacturing solutions.

AGENDA (UK TIME)

09.30-09.35: Welcome

His Excellency Lars Thuesen, Ambassador to the United Kingdom

09.35-09.50: Industry 4.0 and sustainable production in Denmark

Søren Peter Johansen, Technology Manager, Danish Technological Institute

09.50-10.05: Robot technology – a key enabler for the industrial green transition (09.50-10.05)

Mette Abrahamsen, Head of Projects – Odense Robotics

10.05-10.20: National Cluster 'MADE' and 'The MADE-FAST initiative' (Flexible, Agile Sustainable manufacturing supported by Talents)

Merete Nørby, International Senior Consultant – MADE – Manufacturing Academy of Denmark

10.20-10.40: MADE's impact on Danish Manufacturing Industry and SME's: Learnings from two DK SME's: BKI Foods and BM Silo

Merete Nørby, International Senior Consultant – MADE

10.40-10.50: Advanced & sustainable manufacturing – getting started in Denmark (10.40-10.50)

Björn Snorri Gudmundsson Bøg, Special Advisor – Invest in Denmark

10.50-11.00: Q&A

ADVANCED AND SUSTAINABLE MANUFACTURING CASES INTRODUCED BY MADE

BKI Foods is an SME (active in the food industry), which has always grown on own investments and that has implemented inspiring changes related to 'Eco Factory' transformation (e.g. packaging-related eco innovations) and 'Digital Factory' (e.g. digitalization of flow management).

BM SILO is a top class manufacturer of 'Modular Silos' and you will have the opportunity to experience inspiring examples related to Human relations and collaborative aspects and the implementation of manufacturing top-level LEAN principles.
